

THE KFB INCREASE WITHOUT PURL BUMPS

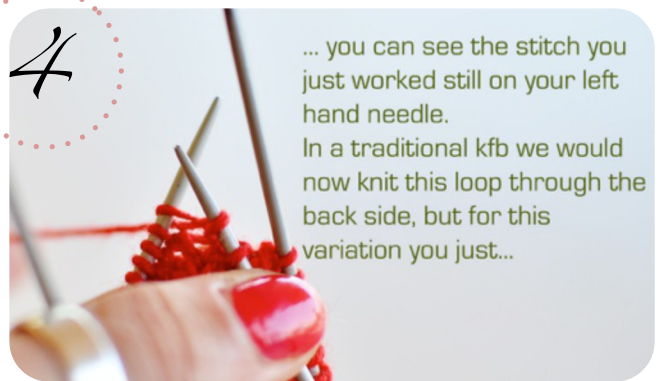

We are ready to make one kfb variation increase into the next stitch....

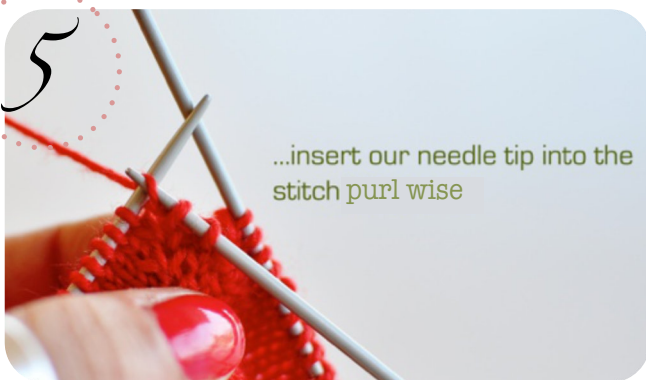

Insert your needle knit wise and knit this stitch....

...without pulling it off the needle....

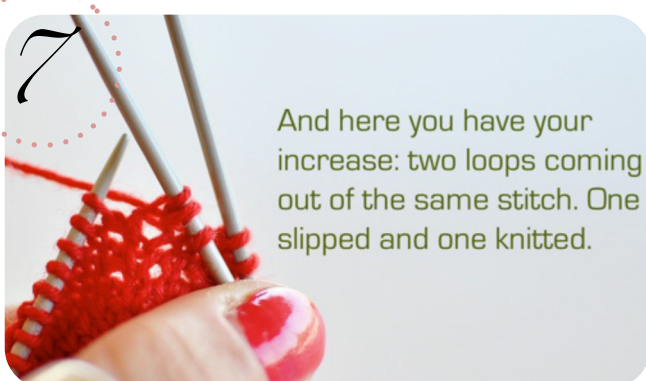

... you can see the stitch you just worked still on your left hand needle. In a traditional kfb we would now knit this loop through the back side, but for this variation you just...

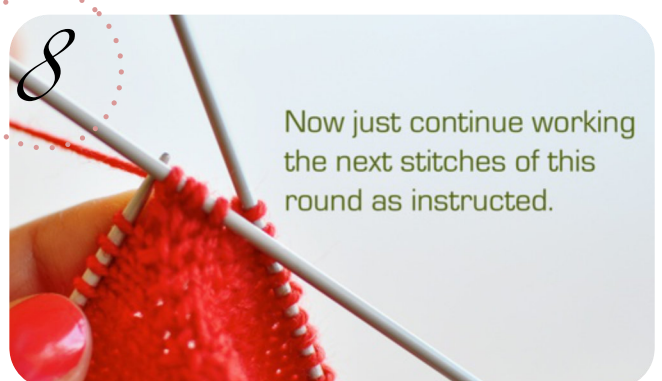

...insert our needle tip into the stitch purl wise

... and pull it off the left hand needle without knitting it at all!

And here you have your increase: two loops coming out of the same stitch. One slipped and one knitted.

Now just continue working the next stitches of this round as instructed.
